

ABOUT

A fine thread that can be used in the needle and as a premium bobbin thread for quilting and embroidery. Available in 36 colors in 2000m (2187yd) spools, 6000m (6500 yd) cones, and prewound bobbins.

APPLICATIONS

Use DecoBob™ for precision piecing, stippling, general sewing, and machine embroidery. Use in sewing machines, embroidery machines, quilting machines, sergers, and handwork.

SPOOL POSITION:

For optimum results, use of a Thread Tamer™ is recommended.

SEWING:

You may need to adjust the top and/or bobbin tensions slightly. Sew at a moderate speed.

Low bobbin sensors may give an inaccurate reading.

THREAD

80wt - 2ply cottonized polyester. Slightly heavier than InvisaFil™ but with similar properties.

Finish: slight sheen

BOBBIN THREAD

- InvisaFil™
 - DecoBob™
-

RECOMMENDED NEEDLE SIZES

Machine:

- 70/10, 80/12 microtex
 - 75/11, 90/14 quilting
 - 80/12, 90/14 topstitch
 - longarm - 16
-

Hand:

#10 or #11 sharps

USES:

A premium bobbin thread, DecoBob™ works with any top thread. Use on top and in the bobbin for fine embroideries and delicate thread lace. This fine thread adds minimal bulk to a seam, making it an excellent choice for precision piecing.

STITCH LENGTH:

For precision piecing, use DecoBob™ in the top and in the bobbin. Shorten straight stitch to 1.5 - 2.0. For added security, backstitch at the beginning and end of each seam.
